Importing various food resources from around the world and exporting to the world

SOFCO engages not only in the procurement of different food materials from around the world, but also in supplying to Asia and to the rest of the world safe, reliable food materials that are produced in Japan or that conform to the Japanese standards. This would not be possible without the global network of the Sojitz Group as a Sogo Shosha.

Bases marked with ■ in the map or table have a strong relationship with SOFCO.

Overseas Bases of the Sojitz Group
